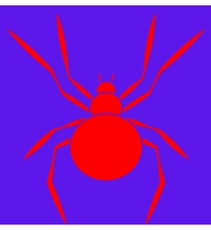
Student Name: _____ Obtain Marks: _____

Behavioral and structural adaptations



Some animal adaptations are **structural**, which means that they are part of the animal's body. Other adaptations are **behavioral**, which means they are things the animal does.

Put an X in the chart to show whether each animal adaptation is structural or behavioral.

Trait	Structural	Behavioral
Birds fly south to warmer places during winter.		
Polar bears have thick white fur to stay warm and blend in.		
Kangaroos hop away quickly when they sense danger.		
Owls have huge eyes to help them see clearly in the dark		
Honeybees perform a dance to show others where food is.		
Ducks have webbed feet to paddle through the water easily.		
Spiders spin webs to catch prey.
