

Student Name: _____

Obtain Marks: _____

Carnivore, herbivore, or omnivore?

Animals can be classified by what they eat.

Herbivores eat only plants.

Carnivores eat only meat.

Omnivores eat both.

For each trait, write herbivore, carnivore, or omnivore. You may need to write more than one answer for some items.

_____ Sharp, pointed beaks for tearing meat

_____ Wide, flat molars for crushing grass and leaves

_____ Strong, hooked claws for catching live prey

_____ Broad, flat teeth together with sharp incisors for eating fruits, nuts, and meat

_____ Eats only grass, leaves, and plant stems

_____ Eats only insects, small animals, or meat

_____ Soft pads on paws for silent stalking

_____ Eyes located on the sides of the head to spot predators while grazing
